Instagram

Instagram has become the primary source of student engagement for Patriot Vision based on the social media habits of our student body. Instagram's Stories feature is used to report the most breaking news in terms of school closings, bell schedule or sports schedule changes, and other important announcements that are of immediate interest or importance to our students. We also conduct live, interactive contests on Instagram in conjunction with our live broadcasts.

Twitter and Facebook

Twitter and Facebook are often used to post our most interesting news stories as well as to conduct interactive contests and live polls during broadcasts. Twitter and Facebook posts typically reach a larger audience outside the student body including parents, teachers, community members, business and organizations that have a connection to campus life at our school.

Snapchat and TikTok:

We maintain an active Snapchat account for fun, informative, or teaser posts about upcoming school announcements. TikTok has been used to promote the school's annual Lip Sync Battle.
