

COMMODORE MEDIA GROUP

LAFAYETTE ATHLETICS

OUR MISSION

A PLAN

Consistency is key. It does not apply to only sports, but also to the media room. At the start of the school year, Commodore Media Group collaborated with the athletics department to hire Content Sports software to create a uniform design across all sporting and academic events for Lafayette High School.

We incorporate our school colors, logos, and specific fonts to make our graphics unique to our many platforms. These graphics include photos and videos taken at each sports media day. Media students set up the studio with lights and backgrounds to make dimensional elements for our players to make them stand out against graphics.

Once pictures are taken, they head into the studio to be edited and cut out to be used on a multitude of graphics. In the same way, videos are edited in CAPCUT or Davinci Resolve with music to post as hype videos for upcoming games. Media students are responsible for completing game day cards, game day fits, final score graphics, etc on time to inform our audience of upcoming events and results.

THE TEAM

Lafayette students enrolled in the Commodore Media Group classes photographed in the studio and edited.

Coordinated with coaches and sports administrators for content and increased collaboration and responsibilities for the media group.

On-location and in-game photographers worked to get post-game images and result graphics.

THE RESULTS

A noticeably improved professional look at a reduced cost to the school.

Community members noticed and commented on the look and the added content.

Increased views and follows for sports accounts.
